Overview

ABSTRACT
The Integrated Living Conditions Survey (ILCS), conducted annually by the NSS National Statistical Service of the Republic of Armenia, formed the basis for monitoring living conditions in Armenia. The ILCS is a universally recognized best-practice survey for collecting data to inform about the living standards of households. The ILCS comprises comprehensive and valuable data on the welfare of households and separate individuals which gives the NSS an opportunity to provide the public with up to date information on the population's income, expenditures, the level of poverty and the other changes in living standards on an annual basis.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
- Households;

- Individuals.

Scope

NOTES
The scope of the Integrated Living Conditions Survey includes:

- List of Household Members;

- Migration;

- Housing and Dwelling Conditions;

- Employment;

- Education;

- Agriculture;

- Food Production;

- Monetary and Commodity Flows between Households;

- Health (General) and Healthcare;

- Debts;

- Subjective Assessment of Living Conditions;

- Provision of Services;

- Social Assistance;

- Households as Employers for Service Personnel;

- Household Monthly Consumption of Energy Resources.

Coverage

Sampling

Sampling Procedure

During the 2001-2003 surveys two-stage random sample was used; the first stage covered the selection of settlements - cities and villages, while the second stage was focused on the selection of households in these settlements. The surveys were conducted on the principle of monthly rotation of households by clusters (sample units). In 2002 and 2003 the number of households was 387 with the sample covering 14 cities and 30 villages in 2002 and 17 cities and 20 villages in 2003.

During the 2004-2006 surveys the sampling frame for the ILCS was built using the database of addresses for the 2001 Population Census; the database was developed with the World Bank technical assistance. The database of addresses of all households in Armenia was divided into 48 strata including 12 communities of Yerevan city. The households from other regions (marzes) were grouped according to the following three categories: big towns with 15,000 and more population; villages, and other towns. Big towns formed 16 strata (the only exception was the Vayots Dzor marz where there are no big towns). The villages and other towns formed 10 strata each. According to this division, a random, two-step sample stratified at marz level was developed. All marzes, as well as all urban and rural settlements were included in the sample population according to the share of population residing in those settlements as percent to the total population in the country.
In the first step, the settlements, i.e. primary sample units, were selected: 43 towns out of 48 or 90 percent of all towns in Armenia were surveyed during the year; also 216 villages out of 951 or 23 percent of all villages in the country were covered by the survey. In the second step, the respondent households were selected: 6,816 households (5,088 from urban and 1,728 from rural settlements). As a result, for the first time since 1996 survey data were representative at the marz level.

During the 2007-2012 surveys the sampling frame for ILCS was designed according to the database of addresses for the 2001 Population Census, which was developed with the World Bank technical assistance. The sample consisted of two parts: core sample and oversample.

1) For the creation of core sample, the sample frame (database of addresses of all households in Armenia) was divided into 48 strata including 12 communities of Yerevan city. The households from other regions (marzes) were grouped according to three categories: large towns (with population of 15000 and higher), villages and other towns. Large towns formed by 16 groups (strata), while the villages and towns formed by 10 strata each. According to that division, a random, two-step sample stratified at the marz level was developed. All marzes, as well as all urban and rural settlements were included in the sample population according to the share of households residing in those settlements as percent to the total households in the country. In the first step, using the PPS method the enumeration units (i.e., primary sample units to be surveyed during the year) were selected. 2007 sample includes 48 urban and 18 rural enumeration areas per month.
2) The oversample was drawn from the list of villages included in MCA-Armenia Rural Roads Rehabilitation Project. The enumeration areas of villages that were already in the core sample were excluded from that list. From the remaining enumeration areas 18 enumeration areas were selected per month. Thus, the rural sample size was doubled.
3) After merging the core sample and oversample, the survey households were selected in the second step. 656 households were surveyed per month, from which 368 from urban and 288 from rural settlements. Each month 82 interviewers had conducted field work, and their workload included 8 households per month. In 2007 number of surveyed households was 7,872 (4,416 from urban and 3,456 from rural areas).

For the survey 2013 the sample frame for ILCS was designed in accordance with the database of addresses of all private households in the country developed on basis of the 2001 Population Census results, with the technical assistance of the World Bank. The method of systematic representative probability sampling was used to frame the sample. For the purpose of drawing the sample, the sample frame was divided into 32 strata including 12 communities of Yerevan City (currently, the administrative districts).
According to this division, a two-tier sample was drawn stratified by regions and by Yerevan. All regions and Yerevan, as well as all urban and rural communities were included in the sample in accordance to the shares of their resident households within the total number of households in the country. In the first round, enumeration areas - that is primary sample units to be surveyed during the year - were selected. The ILCS 2013 sample included 32 enumeration areas in urban and 16 enumeration areas in rural communities per month.
The households to be surveyed were selected in the second round. A total of 432 households were surveyed per month, of which 279 and 153 households from urban and rural communities, respectively. Every month 48 interviewers went on field work with a workload of 9 households per month.

The sample frame for 2014-2016 was designed in accordance with the database of addresses of all private households in the country developed on basis of the 2011 Population Census results, with the technical assistance of the World Bank. The method of systematic representative probability sampling was used to frame the sample.

For drawing the sample, the sample frame was divided into 32 strata including 12 communities of Yerevan City (currently, the administrative districts). According to this division, a two-tier sample was drawn stratified by regions and by Yerevan. All regions and Yerevan, as well as all urban and rural communities were included in the sample in accordance to the shares of their resident households within the total number of households in the country. In the first round, enumeration areas - that is primary sample units to be surveyed during the year - were selected. The ILCS 2014 sample included 30 enumeration areas in urban and 18 enumeration areas in rural communities per month.

The method of representative probability sampling was used to frame the sample. At regional level, all communities were grouped into two categories - towns and villages. According to this division, a two-tier sample was drawn stratified by regions and by Yerevan. All regions and Yerevan, as well as all rural and urban communities were included in the sample in accordance to the shares of their resident households within the total number of households in the country. In the first round, enumeration districts - that is primary sample units to be surveyed during the year - were selected. The ILCS 2015 sample included 30 enumeration districts in urban and 18 enumeration districts in rural communities per month.

Response Rate

In 2008 the survey covered 44 urban and 263 rural areas with the sample size of 7,872 households.

Questionnaires

Overview

The Questionnaire is filled in by the interviewer during the least five visits to households per month. During face-to-face interviews with the household head or another knowledgeable adult member, the interviewer collects information on the composition and housing conditions of the household, the employment status, educational level and health condition of the members, availability and use of land, livestock, and agricultural machinery, monetary and commodity flows between households, and other information.

The 2008 survey questionnaire had the following sections: (1) "List of Household Members", (2) "Migration", (3) "Housing and Dwelling Conditions", (4) "Employment", (5) "Education", (6) "Agriculture", (7) "Food Production", (8) "Monetary and Commodity Flows between Households", (9) "Health (General) and Healthcare", (10) "Debts", (11) "Subjective Assessment of Living Conditions", (12) "Provision of Services", (13) "Social Assistance", (14) "Households as Employers for Service Personnel", and (15) "Household Monthly Consumption of Energy Resources".

The Diary is completed directly by the household for one month. Every day the household would record all its expenditures on food, non-food products and services, also giving a detailed description of such purchases; e.g. for food products the name, quantity, cost, and place of purchase of the product is recorded. Besides, the household records its consumption of food products received and used from its own land and livestock, as well as from other sources (e.g. gifts, humanitarian aid). Non-food products and services purchased or received for free are also recorded in the diary. Then, the household records its income received during the month. At the end of the month, information on rarely used food products, durable goods and ceremonies is recorded, as well. The records in the diary are verified by the interviewer in the course of 5 mandatory visits to the household during the survey month.

The Survey Diary has the following sections: (1) food purchased during the day, (2) food consumed at home during the day, (3) expenditures on food consumed away from home, (4) non-food products purchased and services obtained, (5) non-food products and services received free of charge, (6) household income and monetary inflows, (7) food products, which are usually consumed in small quantities during the day, (8) list of real estate, durable goods, and ceremonies. The interviewer's manual provides detailed instructions for completing the questionnaire and the diary.

The Questionnaire, the Diary and the Interviewer's Manual are revised and adjusted, as appropriate, prior to the launch of the survey. Starting from 2012, data are codified under the "Classification of Individual Consumption by Purpose" (COICOP) classifier.

Content	Housing Conditions
Cases	7872
Variable(s)	350
Structure	Type: relational Keys: recno(special relation record number)
Version	
Producer	National Statistical Service of the Republic of Armenia.
Missing Data	

Variables

ID	NAME	LABEL	TYPE	FORMAT	QUESTION
V1	recno	special relation record number	contin	numeric	
V2	date	number of the month(1,2,....12)	discrete	numeric	
V3	marz	code of marz	discrete	numeric	
V4	typev	type of the area	discrete	numeric	
V5	weight_link	weight for road project	contin	numeric	
V6	weight	weight	contin	numeric	
V7	members	number of the members of the household	discrete	numeric	
V8	a3	does this household has any children in a specialized institution or disables?	discrete	numeric	
V9	a4	if yes, how many children?	discrete	numeric	
V10	a5	if yes, in which kind of specialized institution?	discrete	numeric	
V11	b1	did any of the household members returned during the last 12 months?	discrete	numeric	
V12	b2_1	if yes, how many household members returned to the household during the last 12	discrete	numeric	
V13	b2_1_1	how many household members returned from russia?	discrete	numeric	
V14	b2_1_2	how many household members returned from cis countries?	discrete	numeric	
V15	b2_1_3	how many household members returned from europe?	discrete	numeric	
V16	b2_1_4	how many household members returned from usa or canada ?	discrete	numeric	
V17	b2_1_5	how many household members returned from other?	discrete	numeric	
V18	b2_2	if yes, how many household members returned to the household during the last 12	discrete	numeric	
V19	b2_2_1	how many household members returned from yerevan?	discrete	numeric	
V20	b2_2_2	how many household members returned from other town of armenia ?	discrete	numeric	
V21	b2_2_3	how many household members returned from other village of armenia?	discrete	numeric	
V22	c1	type of housing	discrete	numeric	
V23	c2	does the household own this dwelling or is it rented?	discrete	numeric	
V24	c3_1	if the household rents the dwelling from a private person, then how much is the	contin	numeric	

V25	c3_2	if the household rents the dwelling from a private person, then how much is the	contin	numeric
V26	c3_3	if the household rents the dwelling from a private person, then how much is the	discrete	numeric
V27	c4	how many rooms does the household occupy (exclude bathroom, toilet, kitchen)?	discrete	numeric
V28	c5	occupied living floor area of your dwelling	contin	numeric
V29	c6	did you change dwelling during the last 5 years?	discrete	numeric
V30	c7	why did you move?	discrete	numeric
V31	c8	was your electricity cut off because of non-payment during the last 12 months?	discrete	numeric
V32	c9_1	kitchen	discrete	numeric
V33	c9_2	flush toilet	discrete	numeric
V34	c9_3	outside toilet	discrete	numeric
V35	c9_4	bathtub or shower	discrete	numeric
V36	c9_5	telephone	discrete	numeric
V37	c9_6	mobile phone	discrete	numeric
V38	c9_7	cold running water	discrete	numeric
V39	c9_8	hot running water	discrete	numeric
V40	c9_9	centralized gas supply	discrete	numeric
V41	c9_10	radio	discrete	numeric
V42	c10	what sources of water do you use?	discrete	numeric
V43	c11	where is your water tap located ?	discrete	numeric
V44	c12	how many hours a day do you have potable water	contin	numeric
V45	c13_1	quality of cold water(transparency)	discrete	numeric
V46	c13_2	quality of cold water(smell)	discrete	numeric
V47	c13_3	quality of cold water(colour)	discrete	numeric
V48	c13_4	quality of cold water(taste)	discrete	numeric
V49	c14	what heating system do you mainly use for the house ?	discrete	numeric
V50	c15_1	if you do not have a centralized heating, how do you heat your house (heating oi	discrete	numeric
V51	c15_2	if you do not have a centralized heating, how do you heat your house (electricit	discrete	numeric
V52	c15_3	if you do not have a centralized heating, how do you heat your house (gas)	discrete	numeric
V53	c15_4	if you do not have a centralized heating, how do you heat your house (coal)	discrete	numeric
V54	c15_5	if you do not have a centralized heating, how do you heat your house (wood)	discrete	numeric
V55	c15_6	if you do not have a centralized heating, how do you heat your house (other)	discrete	numeric
V56	c16	how much did you spend on the heating of your house during the last winter?	contin	numeric
V57	c17	how does the household get rid of garbage?	discrete	numeric
V58	c18_1	not enough space	discrete	numeric

V59	c18_2	noise from neighbors or from outside	discrete	numeric
V60	c18_3	insufficiency of daylight	discrete	numeric
V61	c18_4	in sufficiency of warmth	discrete	numeric
V62	c18_5	humidity	discrete	numeric
V63	c18_6	leaking roof	discrete	numeric
V64	c18_7	rotten walls, floors	discrete	numeric
V65	c18_8	rot in window frames and doors	discrete	numeric
