Overview

ABSTRACT
The Integrated Living Conditions Survey (ILCS), conducted annually by the NSS National Statistical Service of the Republic of Armenia, formed the basis for monitoring living conditions in Armenia. The ILCS is a universally recognized best-practice survey for collecting data to inform about the living standards of households. The ILCS comprises comprehensive and valuable data on the welfare of households and separate individuals which gives the NSS an opportunity to provide the public with up to date information on the population’s income, expenditures, the level of poverty and the other changes in living standards on an annual basis.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
- Households;

- Individuals.

Scope

NOTES
The scope of the Integrated Living Conditions Survey includes:

- List of Household Members;

- Migration;

- Housing and Dwelling Conditions;

- Employment;

- Education;

- Agriculture;

- Food Production;

- Monetary and Commodity Flows between Households;

- Health (General) and Healthcare;

- Debts;

- Subjective Assessment of Living Conditions;

- Provision of Services;

- Social Assistance;

- Households as Employers for Service Personnel;

- Household Monthly Consumption of Energy Resources.

Coverage

GEOGRAPHIC COVERAGE
Urban and rural communities

Sampling

Sampling Procedure

During the 2001-2003 surveys two-stage random sample was used; the first stage covered the selection of settlements - cities and villages, while the second stage was focused on the selection of households in these settlements. The surveys were conducted on the principle of monthly rotation of households by clusters (sample units). In 2002 and 2003 the number of households was 387 with the sample covering 14 cities and 30 villages in 2002 and 17 cities and 20 villages in 2003.

During the 2004-2006 surveys the sampling frame for the ILCS was built using the database of addresses for the 2001 Population Census; the database was developed with the World Bank technical assistance. The database of addresses of all households in Armenia was divided into 48 strata including 12 communities of Yerevan city. The households from other regions (marzes) were grouped according to the following three categories: big towns with 15,000 and more population; villages, and other towns. Big towns formed 16 strata (the only exception was the Vayots Dzor marz where there are no big towns). The villages and other towns formed 10 strata each. According to this division, a random, two-step sample stratified at marz level was developed. All marzes, as well as all urban and rural settlements were included in the sample population according to the share of population residing in those settlements as percent to the total population in the country.
In the first step, the settlements, i.e. primary sample units, were selected: 43 towns out of 48 or 90 percent of all towns in Armenia were surveyed during the year; also 216 villages out of 951 or 23 percent of all villages in the country were covered by the survey. In the second step, the respondent households were selected: 6,816 households (5,088 from urban and 1,728 from rural settlements). As a result, for the first time since 1996 survey data were representative at the marz level.

During the 2007-2012 surveys the sampling frame for ILCS was designed according to the database of addresses for the 2001 Population Census, which was developed with the World Bank technical assistance. The sample consisted of two parts: core sample and oversample.

1) For the creation of core sample, the sample frame (database of addresses of all households in Armenia) was divided into 48 strata including 12 communities of Yerevan city. The households from other regions (marzes) were grouped according to three categories: large towns (with population of 15000 and higher), villages and other towns. Large towns formed by 16 groups (strata), while the villages and towns formed by 10 strata each. According to that division, a random, two-step sample stratified at the marz level was developed. All marzes, as well as all urban and rural settlements were included in the sample population according to the share of households residing in those settlements as percent to the total households in the country. In the first step, using the PPS method the enumeration units (i.e., primary sample units to be surveyed during the year) were selected. 2007 sample includes 48 urban and 18 rural enumeration areas per month.
2) The oversample was drawn from the list of villages included in MCA-Armenia Rural Roads Rehabilitation Project. The enumeration areas of villages that were already in the core sample were excluded from that list. From the remaining enumeration areas 18 enumeration areas were selected per month. Thus, the rural sample size was doubled.
3) After merging the core sample and oversample, the survey households were selected in the second step. 656 households were surveyed per month, from which 368 from urban and 288 from rural settlements. Each month 82 interviewers had conducted field work, and their workload included 8 households per month. In 2007 number of surveyed households was 7,872 (4,416 from urban and 3,456 from rural areas).

For the survey 2013 the sample frame for ILCS was designed in accordance with the database of addresses of all private households in the country developed on basis of the 2001 Population Census results, with the technical assistance of the World Bank. The method of systematic representative probability sampling was used to frame the sample. For the purpose of drawing the sample, the sample frame was divided into 32 strata including 12 communities of Yerevan City (currently, the administrative districts).
According to this division, a two-tier sample was drawn stratified by regions and by Yerevan. All regions and Yerevan, as well as all urban and rural communities were included in the sample in accordance to the shares of their resident households within the total number of households in the country. In the first round, enumeration areas - that is primary sample units to be surveyed during the year - were selected. The ILCS 2013 sample included 32 enumeration areas in urban and 16 enumeration areas in rural communities per month.
The households to be surveyed were selected in the second round. A total of 432 households were surveyed per month, of which 279 and 153 households from urban and rural communities, respectively. Every month 48 interviewers went on field work with a workload of 9 households per month.

The sample frame for 2014-2016 was designed in accordance with the database of addresses of all private households in the country developed on basis of the 2011 Population Census results, with the technical assistance of the World Bank. The method of systematic representative probability sampling was used to frame the sample.

For drawing the sample, the sample frame was divided into 32 strata including 12 communities of Yerevan City (currently, the administrative districts). According to this division, a two-tier sample was drawn stratified by regions and by Yerevan. All regions and Yerevan, as well as all urban and rural communities were included in the sample in accordance to the shares of their resident households within the total number of households in the country. In the first round, enumeration areas - that is primary sample units to be surveyed during the year - were selected. The ILCS 2014 sample included 30 enumeration areas in urban and 18 enumeration areas in rural communities per month.
The method of representative probability sampling was used to frame the sample. At regional level, all communities were grouped into two categories - towns and villages. According to this division, a two-tier sample was drawn stratified by regions and by Yerevan. All regions and Yerevan, as well as all rural and urban communities were included in the sample in accordance to the shares of their resident households within the total number of households in the country. In the first round, enumeration districts - that is primary sample units to be surveyed during the year - were selected. The ILCS 2015 sample included 30 enumeration districts in urban and 18 enumeration districts in rural communities per month.

Response Rate

In 2010 a total of 7,872 households were selected, of which 4,416 and 3,456 households from urban and rural communities, respectively.

Questionnaires

Overview

The Questionnaire is filled in by the interviewer during the least five visits to households per month. During face-to-face interviews with the household head or another knowledgeable adult member, the interviewer collects information on the composition and housing conditions of the household, the employment status, educational level and health condition of the members, availability and use of land, livestock, and agricultural machinery, monetary and commodity flows between households, and other information.

The 2010 survey questionnaire had the following sections: (1) "List of Household Members", (2) "Migration", (3) "Housing and Dwelling Conditions", (4) "Employment", (5) "Education", (6) "Agriculture", (7) "Food Production", (8) "Monetary and Commodity Flows between Households", (9) "Health (General) and Healthcare", (10) "Debts", (11) "Subjective Assessment of Living Conditions", (12) "Provision of Services", (13) "Social Assistance", (14) "Households as Employers for Service Personnel", and (15) "Household Monthly Consumption of Energy Resources".

The Diary is completed directly by the household for one month. Every day the household would record all its expenditures on food, non-food products and services, also giving a detailed description of such purchases; e.g. for food products the name, quantity, cost, and place of purchase of the product is recorded. Besides, the household records its consumption of food products received and used from its own land and livestock, as well as from other sources (e.g. gifts, humanitarian aid). Non-food products and services purchased or received for free are also recorded in the diary. Then, the household records its income received during the month. At the end of the month, information on rarely used food products, durable goods and ceremonies is recorded, as well. The records in the diary are verified by the interviewer in the course of 5 mandatory visits to the household during the survey month.

The Survey Diary has the following sections: (1) food purchased during the day, (2) food consumed at home during the day, (3) expenditures on food consumed away from home, (4) non-food products purchased and services obtained, (5) non-food products and services received free of charge, (6) household income and monetary inflows, (7) food products, which are usually consumed in small quantities during the day, (8) list of real estate, durable goods, and ceremonies. The interviewer’s manual provides detailed instructions for completing the questionnaire and the diary.

The Questionnaire, the Diary and the Interviewer's Manual are revised and adjusted, as appropriate, prior to the launch of the survey. Starting from 2012, data are codified under the "Classification of Individual Consumption by Purpose" (COICOP) classifier.

Range: 1-80

Valid cases: 2258
Invalid: 30095
Minimum: 1
Maximum: 80

During your last visit to a hospital, did you stay overnight? (i1_21)

File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 2258
Invalid: 30095
Minimum: 1
Maximum: 2

For how long did you stay at a hospital during the last visit? (i1_22)

File: mem

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0
Range: 0-150

Valid cases: 1057
Invalid: 31296
Minimum: 0
Maximum: 150

What type of specialist was your main provider of medical assistance during your (i1_23)

File: mem

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-11

Valid cases: 2258
Invalid: 30095
Minimum: 1
Maximum: 11

How much did you pay to the hospital cashier for costs associated with your last (i1_24)

File: mem

Overview

Type: Continuous
Format: numeric
Width: 7
Decimals: 0
Range: 0-2700000

Valid cases: 32353
Invalid: 0
Minimum: 0
Maximum: 2700000

How much did you pay directly to medical staff (i1_25)

File: mem

Overview

Type: Continuous
Format: numeric
Width: 7
Decimals: 0
Range: 0-1800000

Valid cases: 32353
Invalid: 0
Minimum: 0
Maximum: 1800000

Did you make any gifts or provide any services to this person, besides the payme (i1_26)

File: mem

Overview

Type: Continuous
Format: numeric
Width: 5
Decimals: 0
Range: 0-60000

Valid cases: 32353
Invalid: 0
Minimum: 0
Maximum: 60000

Did you have to make any other payments, including payments for laboratory tests (i1_27)

File: mem

Overview

Type: Continuous
Format: numeric
Width: 6
Decimals: 0
Range: 0-350000

Valid cases: 32353
Invalid: 0
Minimum: 0
Maximum: 350000

What was your opinion of the service received during your last visit to hospital (i1_28)

File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-3

Valid cases: 2258
Invalid: 30095
Minimum: 1
Maximum: 3

Has any member from your household the right to use BBP (i1_29)

File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-3

Valid cases: 29986
Invalid: 2367
Minimum: 1
Maximum: 3

Did you take the child to the polyclinics for preventive examination or postnata (i2_2)

File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 2165
Invalid: 30188
Minimum: 1
Maximum: 2

If yes, how many times? (i2_3)

File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-6

Valid cases: 739
Invalid: 31614
Minimum: 1
Maximum: 6

Did your child receive an immunization during the last 30 days? (i2_4)

File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 739
Invalid: 31614
Minimum: 1
Maximum: 2

Did your child receive a blood test during the last 30 days? (i2_5)
File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 739
Invalid: 31614
Minimum: 1
Maximum: 2

Where did you deliver your child? (i2_6)
File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-4

Valid cases: 2165
Invalid: 30188
Minimum: 1
Maximum: 4

How much did you pay in total for the delivery of your child? (i2_7)
File: mem

Overview

Type: Continuous
Format: numeric
Width: 6
Decimals: 0
Range: 0-500000

Valid cases: 2165
Invalid: 30188
Minimum: 0
Maximum: 500000

Did you breastfeed? (i2_8)
File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 2165
Invalid: 30188
Minimum: 1
Maximum: 2

If yes, for how many months? (i2_9)
File: mem

Overview

Type: Continuous
Format: numeric
Width: 5
Decimals: 2
Range: 0.1-48

Valid cases: 2052
Invalid: 30301
Minimum: 0.1
Maximum: 48

Who is taking care of your kids usually when you are not at home? (i2_10)

File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-7

Valid cases: 2165
Invalid: 30188
Minimum: 1
Maximum: 7

If the answer to question 2 is “no”, please specify why did not you go to postna (i2_11)

File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-7

Valid cases: 1426
Invalid: 30927
Minimum: 1
Maximum: 7

What are the main problems in your households? (k1_1)

File: mem

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-6
